Document Title:	How to update RAID BIOS of ROMB (Embedded SAS RAID) ?
Document ID:	TID0701261424
Creation Date:	26 Jan. 2007
Modified Date:	
Document Revision:	0
	1 move BBU troubleshooting to TID0612071320
Product Class:	Servers
Product and Version:	T880 / R480

Symptoms / Facts

ROMB RAID controller is not properly identified on POST "???" see below:

Note: in this screen shot, there is also an error about BBU. See TID0612071320 for this problem

Cause

BIOS coming by default with motherboard is not up to date.

Solutions / Fixes

Update Flash ROMB firmware using BOOT_CD 1.0.7 or higher

To confirm flash is ok, "???" should be replaced by "ROMB" on .

See also (if applicable)

This update will be included in automatic mode in version 1.0.7 of BOOT_CD.
