

Document Title:	How to produce a test Alert with ESMPro Agent
Document ID:	TID0712211022
Creation Date:	21 December 2007
Modified Date:	
Document Revision:	0
Product Class:	Servers
Product and Version:	Server with ESMPro Agent

Symptoms / Facts

After a configuration of ESMPro Agent and ESMPro Manager, it important to test the Alert system.

It can be done from the ESM Pro Agent, see following screenshots:

From Control Panel, open ESMPro Agent Icon, click Report Settings:

Right click on any pre-build event and get the test menu.
In this example screenshot, we open "EventLog / System / dmio / ID 5"

As a consequence, test alert is received in Alert Viewer

See also (if applicable)

If TCP/IP In-Band reporting method is used, notice that a Test method exist also. See TID0310071000 for details.
