### **Symptoms / Facts**

The following table contains links approved Microsoft security hotfixes. These patches do not overwrite FT specific files or adversely impact FT functionality. This list is applicable for all Bull Fault Tolerant System :

- Express5800 320La, 320Lb, 320Lc
- NovaScale R620, R620 E1, R630, R630 E1

### **Solutions / Fixes**

Bull 's approval of patches and hotfixes means these patches have been verified that they do not overwrite fault-tolerant specific files or adversely impact fault-tolerant functionality. Bull provides no warranties as to the usability or applicability of these updates or hotfixes as provided by Microsoft. Please exercise due caution when installing any of these patches and ensure they are necessary for the specific situation. Ensure recovery options exist if the installation fails by following best-practices such as performing a complete backup prior to attempting installation and/or testing on a non-production system.

This list only applies to patches and hotfixes related to the Microsoft Windows operating system. This does not apply to applications, which may include, but is not limited to, Microsoft Office products, Media Player, Internet Explorer, MS Exchange, or MS SQL. System with Veritas Volume Manager Application installed see the list of hot fixes at the end of this document.

Do not install any updates or hotfixes related to the operating system unless it is on Bull's approved list. If you are considering an operating system-related patch or hotfix that is not on the list, please contact Bull Technical Support to determine if there are any recent additions. Updates or hotfixes not related to the operating system should not affect the fault-tolerant functionality of the Bull fault-tolerant server and, if installed, are at your own risk.
