Eviden PSIRT

List of changes

Version	Date	Description
0.1	2025/08/21	Initial Eviden version
2.2	2025/12/05	TLP changed for CLEAR

Executive summary

Red Hat has released a set security advisories addressing several vulnerabilities in the Linux kernel. The update includes important security fixes designed to protect systems from potential exploits. Users are strongly advised to apply the kernel update promptly to maintain system integrity and prevent unauthorized access.

CVE-2025-21927: score 8.1

In the Linux kernel, the following vulnerability has been resolved:\n\nnvme-tcp: fix potential memory corruption in nvme_tcp_recv_pdu()\n\nnvme_tcp_recv_pdu() doesn't check the validity of the header length.\nWhen header digests are enabled, a target might send a packet with an\ninvalid header length (e.g. 255), causing nvme_tcp_verify_hdgst()\nto access memory outside the allocated area and cause memory corruptions\nby overwriting it with the calculated digest.\n\nFix this by rejecting packets with an unexpected header length.

kernel: nvme-tcp: fix potential memory corruption in nvme_tcp_recv_pdu()

RHSA-2025_4339

RHSA- 2025_4339	Red Hat Security Advisory: kernel security update	
CVE	CVE-2025-21927	
Summary	An update for kernel is now available for Red Hat Enterprise Linux 9.2 Extended Update Support.	
Description	Red Hat Product Security has rated this update as having a security impact of Important. A Common Vulnerability Scoring System (CVSS) base score, which gives a detailed severity rating, is available for each vulnerability from the CVE link(s) in the References section.	
Bess. iption	The kernel packages contain the Linux kernel, the core of any Linux operating system. Security Fix(es):

Red Hat Security Advisories: kernel security update - RHSA-2025_4339 - Evider CVE-2025-21927 PSIRT

 kernel: nvme-tcp: fix potential memory corruption in nvme_tcp_recv_pdu() (CVE-2025-21927)

For more details about the security issue(s), including the impact, a CVSS score, acknowledgments, and other related information, refer to the CVE page(s) listed in the References section.

Affected products

Linux Kernels used in all Eviden products are updated on a regular basis to guarantee that they are not older than 6 month when products are released.

Although Eviden tries to provide accurate and complete information, Eviden shall not be liable if the above table is incomplete or erroneous. During its vulnerability analysis process, the information in this document is subject to change without notice to reflect new results of this analysis.

Recommendations

Using uname -r you can check the current running kernel version. The version provided by this patch is kernel-5.14.0-284.115.1.el9_2. Recommendation is to check that running kernel version is at least this level.

Available Vendor Patches

It is highly recommended to apply the latest kernel security patches released by Red Hat without delay. These updates contain critical fixes that address vulnerabilities which could be exploited by attackers. Prompt installation of these patches helps ensure your systems remain secure and stable. Regularly updating your systems with Red Hat's security fixes is essential for maintaining a strong defense against potential threats.

Available Workarounds

No workaround is available.

Available Mitigations

No mitigation identified.

Eviden PSIRT

Glossary of terms

Term	Description
Mitigation	Refers to a setting, common configuration, or general best-
	practice, existing in a default state that could reduce the
	severity of exploitation of a vulnerability
Neutralization	The neutralization phase is the decision-making process
	during which the risk posed by an incident is evaluated.
PoC	Proof of Concept
Remediation	The remediation phase ends with the delivering of a qualified
	solution/update fixing the vulnerability without regression.
TI	Threat Intelligence
TLP	Traffic Light Protocol (TLP) FIRST Standards Definitions and
	Usage Guidance — Version 2.0. <u>https://www.first.org/tlp/</u>
Workaround	Refers to a setting or configuration change that does not
	correct the underlying vulnerability but would help block
	known attack vectors before you apply the update

About this document

Eviden continuously monitors the security of its products. This Security Bulletin is shared under the constraints of the FIRST Traffic Light Protocol version 2.0 (TLP) to bring the attention of owners of the potentially affected Eviden products. Eviden recommends that all product owners determine whether the described situation is applicable to their individual case and take appropriate action.

Although Eviden tries to provide accurate and complete information, Eviden shall not be liable for technical or editorial errors contained in this Bulletin. The information is provided "as is" without warranty of any kind. To the extent permitted by the Law, neither Eviden nor its affiliates, subcontractors or suppliers will be liable for incidental damages, downtime cost, lost profits, damages relating to the procurement of substitute products or services, or damages for loss of data, or software restoration. Product and company names mentioned herein may be trademarks of their respective owners.

The information in this document is subject to change without notice. The version of this document will be incremented according to the changes:

- Neutralization security bulletins are numbered 0.x
- Privately disclosed Remediation security bulletins are numbered 1.x
- Publicly disclosed Remediation security bulletins are numbered 2.x

About Atos

Atos is a global leader in digital transformation with 105,000 employees and annual revenue of c. € 11 billion. European number one in cybersecurity, cloud and high-performance computing, the Group provides tailored end-to-end solutions for all industries in 69 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos is a SE (Societas Europaea) and listed on Euronext Paris.

The <u>purpose of Atos</u> is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.

About Eviden¹

<u>Eviden</u> is a next-gen technology leader in data-driven, trusted and sustainable digital transformation with a strong portfolio of patented technologies. With worldwide leading positions in advanced computing, security, AI, cloud and digital platforms, it provides deep expertise for all industries in more than 47 countries. Bringing together 53,000 world-class talents, Eviden expands the possibilities of data and technology across the digital continuum, now and for generations to come. Eviden is an Atos Group company with an annual revenue of c. € 5 billion.
