

Security Bulletin

Vulnerabilities in Golang cmd/go

Author(s)	:	Eviden PSIRT
Reference	:	PSIRT-5231
Created	:	23 December 2025
Version	:	2.1
Status	:	Remediation
TLP Classification	:	CLEAR
Document date	:	7 January 2026
Keywords	:	CVE-2025-4674

TLP:CLEAR

FOR PUBLIC USE

List of changes

Version	Date	Description
2.1	2026/01/07	Initial Eviden version

Executive summary

A flaw was found in cmd/go. The go command can execute arbitrary commands when processing untrusted version control system (VCS) repositories containing malicious configuration. This issue occurs because the command interprets VCS metadata, potentially leading to unintended command execution. This vulnerability allows a malicious actor to trigger this by providing a repository with a crafted VCS configuration, resulting in arbitrary code execution within the context of the go process.

Vulnerability Info

CVE No.	CVSS Score	Type of Vulnerability
CVE-2025-4674	8.6	CWE-73 External Control of File Name or Path

Eviden is investigating the exact nature of these vulnerabilities to provide validated remediation.

Affected components

Products	Fixed version	Status	Comments
Golang	golang-1.24.6-1.el10_0	Fixed	

Although Eviden tries to provide accurate and complete information, Eviden shall not be liable if the above table is incomplete or erroneous. During its vulnerability analysis process, the information in this document is subject to change without notice to reflect new results of this analysis.

TBD (to be defined) indicates that a new version fixing the vulnerabilities is under study.

Unpatched means that the vulnerability is presumably present, but there is no plan to provide a fix. This can be investigated on demand.

List of HPC Management products

Products	Fixed version	Status	Comment
BullSequana ARGOS	2.0	Fixed	Affected version: 1.1

Recommendations

Eviden recommends applying its Technical States upgrade on its servers as soon as they are made available.

Available Vendor Patches

Vendor indicated patch golang-1.24.6-1.el10_0

Available Workarounds

No workaround is available.

Available Mitigations

No mitigation identified.

Available Exploits/PoC

Eviden is not aware of any exploitation of the reported vulnerabilities.

Glossary of terms

Term	Description
Mitigation	Refers to a setting, common configuration, or general best-practice, existing in a default state that could reduce the severity of exploitation of a vulnerability
Neutralization	The neutralization phase is the decision-making process during which the risk posed by an incident is evaluated.
PoC	Proof of Concept
Remediation	The remediation phase ends with the delivering of a qualified solution/update fixing the vulnerability without regression.
TI	Threat Intelligence
TLP	Traffic Light Protocol (TLP) FIRST Standards Definitions and Usage Guidance — Version 2.0. https://www.first.org/tlp/
Workaround	Refers to a setting or configuration change that does not correct the underlying vulnerability but would help block known attack vectors before you apply the update

About this document

Eviden continuously monitors the security of its products. This Security Bulletin is shared under the constraints of the FIRST Traffic Light Protocol version 2.0 (TLP) to bring the attention of owners of the potentially affected Eviden products. Eviden recommends that all product owners determine whether the described situation is applicable to their individual case and take appropriate action.

Although Eviden tries to provide accurate and complete information, Eviden shall not be liable for technical or editorial errors contained in this Bulletin. The information is provided “as is” without warranty of any kind. To the extent permitted by the Law, neither Eviden nor its affiliates, subcontractors or suppliers will be liable for incidental damages, downtime cost, lost profits, damages relating to the procurement of substitute products or services, or damages for loss of data, or software restoration. Product and company names mentioned herein may be trademarks of their respective owners.

The information in this document is subject to change without notice. The version of this document will be incremented according to the changes:

- Neutralization security bulletins are numbered 0.x
- Privately disclosed Remediation security bulletins are numbered 1.x
- Publicly disclosed Remediation security bulletins are numbered 2.x

About Atos

Atos is a global leader in digital transformation with 105,000 employees and annual revenue of c. € 11 billion. European number one in cybersecurity, cloud and high-performance computing, the Group provides tailored end-to-end solutions for all industries in 69 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos is a SE (Societas Europaea) and listed on Euronext Paris.

The [purpose of Atos](#) is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.

About Eviden¹

[Eviden](#) is a next-gen technology leader in data-driven, trusted and sustainable digital transformation with a strong portfolio of patented technologies. With worldwide leading positions in advanced computing, security, AI, cloud and digital platforms, it provides deep expertise for all industries in more than 47 countries. Bringing together 53,000 world-class talents, Eviden expands the possibilities of data and technology across the digital continuum, now and for generations to come. Eviden is an Atos Group company with an annual revenue of c. € 5 billion.

¹ Eviden business is operated through the following brands: AppCentrica, ATHEA, BullSequana, Cloudamize, Cloudreach, Cryptovision, DataSantics, Edifixio, Energy4U, Engage ESM, Evidian, Forensik, IDEAL GRP, IDnomic, In Fidem, Ipsotek, Maven Wave, Profit4SF, SEC Consult, Trustway, Visual BI, Worldgrid, X-Perion.
